

ECS Rubric - Website Project

Student Name: _____

Period: _____ PC #: _____

I highly recomend that you do not simply *google how to do something*. There is a great dill of **HTML** and **CSS** examples that are outdated or worse. Some of this code will not even pass the valiators at **W3C**. I will only help with *HTML* and *CSS* found on my notes or <https://www.w3schools.com/>.

All of the files are in your <i>FRHSDrop</i> Folder.	/ 2
The main webpage is called index.html.	/ 2
There is a css file with at least 4 selectors and 2 id selectors.	/ 4
Besides from <i>index.html</i> , there are three other webpages ending in html.	/ 4
These three other webpages are linked to index.html.	/ 2
There is a list on your website.	/ 2
There is a table on your website.	/ 2
The <i>html</i> files pass https://validator.w3.org	/ 4
The <i>css</i> file pass http://jigsaw.w3.org/css-validator/	/ 4
The website looks good and is easy to navagite.	/ 4
Total:	/ 30
